APPENDIX A

Choose the bird first, then the entrance hole

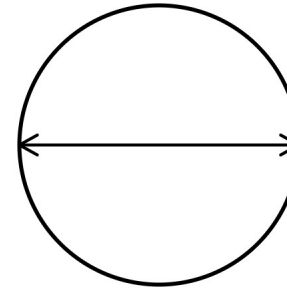

Holes shown at true size when printed on A5 (100%)

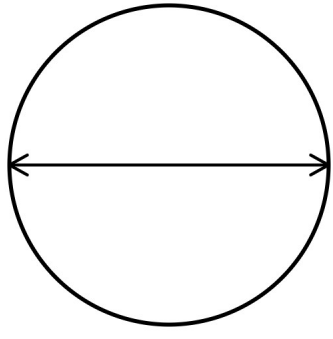

Blue tit
Ø 2.8 cm

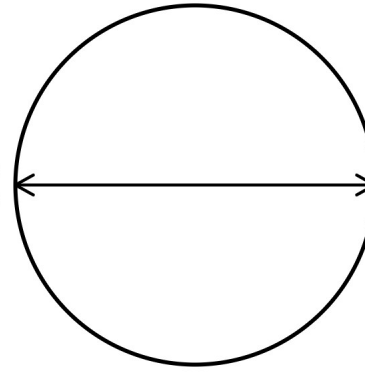

Great tit
Ø 3.2 cm

House sparrow
Ø 3.5 cm

Tree sparrow
Ø 4.0 cm

Starling
Ø 4.5 cm

Hole too large: other birds or predators can get in.
Hole too small: the intended bird cannot fit.
So drill the entrance hole in step 1.3 to exactly the chosen size.
Dimensions and hanging height: see Appendix B

APPENDIX B

Dimensions and hanging height per bird

Blue tit

ENTRANCE HOLE	INTERIOR SIZE	HANGING HEIGHT
Ø 2.8 cm	**12 × 12 × 26 cm**	**2–3 m**

Keep at least 3 m away from a great tit box.

Great tit

ENTRANCE HOLE	INTERIOR SIZE	HANGING HEIGHT
Ø 3.2 cm	**12 × 12 × 26 cm**	**2–3 m**

Hang two great tit boxes at least 10 m apart.

House sparrow

ENTRANCE HOLE	INTERIOR SIZE	HANGING HEIGHT
Ø 3.5 cm	**11 × 21 cm**	**> 2 m**

Hang against a building; row of 3 compartments, each 11 cm wide.

Tree sparrow

ENTRANCE HOLE	INTERIOR SIZE	HANGING HEIGHT
Ø 4.0 cm	**12 × 12 × 26 cm**	**2–3 m**

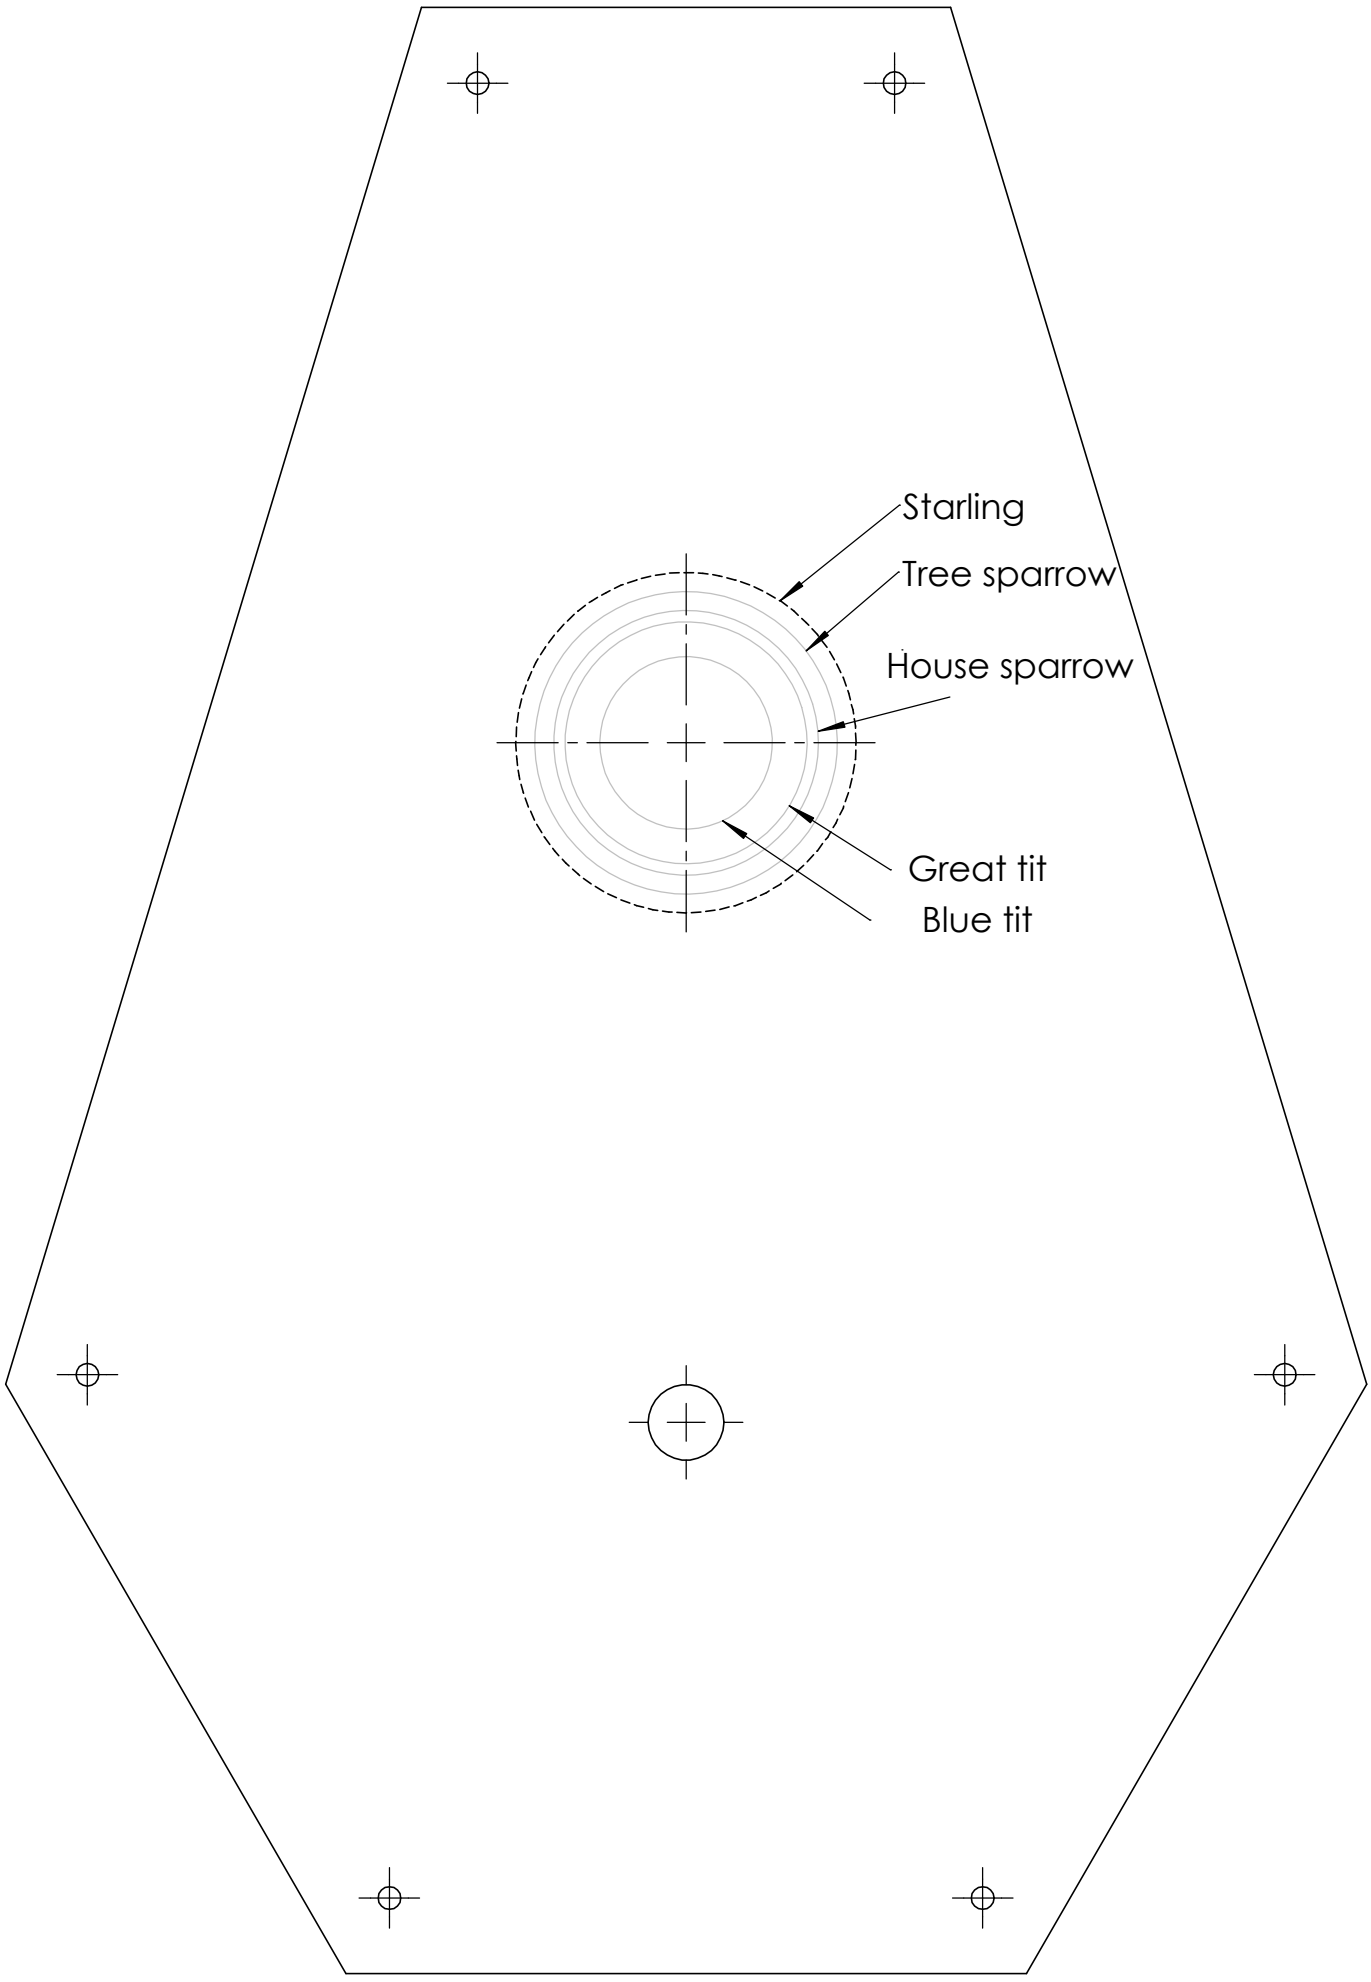

Hang several boxes close together; sparrows like company.

Starling

ENTRANCE HOLE	INTERIOR SIZE	HANGING HEIGHT
Ø 4.5 cm	**16 × 16 × 30 cm**	**2–5 m**

Traditionally nests under roof tiles; also suits a house wall.

Interior sizes in cm: width × depth × height. House sparrow: width × height per compartment.
